

CCP PROGRAMS

WCE CCP - ELECTROCARDIOGRAM TECHNICIAN

1. The student will be able to identify the components of an ECG tracing.

 2. The student will be able to identify the normal ranges for each component of an ECG tracing.

 3. The student will be able to identify the normal ranges for each component of an ECG tracing.

4. The student will be able to identify the normal ranges for each component of an ECG tracing.

5. The student will be able to identify the normal ranges for each component of an ECG tracing.

 6. The student will be able to identify the normal ranges for each component of an ECG tracing.

 7. The student will be able to identify the normal ranges for each component of an ECG tracing.

 8. The student will be able to identify the normal ranges for each component of an ECG tracing.

 9. The student will be able to identify the normal ranges for each component of an ECG tracing.

 10. The student will be able to identify the normal ranges for each component of an ECG tracing.

11. The student will be able to identify the normal ranges for each component of an ECG tracing.

12. The student will be able to identify the normal ranges for each component of an ECG tracing.

 13. The student will be able to identify the normal ranges for each component of an ECG tracing.

 14. The student will be able to identify the normal ranges for each component of an ECG tracing.

 15. The student will be able to identify the normal ranges for each component of an ECG tracing.

16. The student will be able to identify the normal ranges for each component of an ECG tracing.

Workforce Continuing Education Career & College Promise (WCE CCP)

1. The student will be able to identify the components of an ECG tracing.

 2. The student will be able to identify the normal ranges for each component of an ECG tracing.

 3. The student will be able to identify the normal ranges for each component of an ECG tracing.

 4. The student will be able to identify the normal ranges for each component of an ECG tracing.

 5. The student will be able to identify the normal ranges for each component of an ECG tracing.
